CAREER OBJECTIVE

Computer Science and Engineering student with hands-on experience in AI/ML and full-stack development, seeking software engineering or AI/ML internship opportunities to build practical solutions, strengthen problem-solving skills, and contribute to real-world projects.

EDUCATION

B.Tech, Computer Science & Engineering 2024 – 2028
Keshav Memorial Institute of Technology

TECHNICAL TRAINING

- **Artificial Intelligence & Deep Learning** — ANN, CNN, Transformers, RAG and Agentic AI concepts | Jul 2026 – Sep 2026
- **Web Development** — **HTML, CSS, JavaScript & React** — frontend fundamentals and component-based UI development | Jul 2026 – Sep 2026
- **Java Programming** — OOP concepts, arrays, strings, collections and problem solving | Dec 2025 – Mar 2026
- **Python Programming** — fundamentals, data structures, functions and problem solving | Aug 2025 – Dec 2025

PROJECTS

NeuroBot: EEG-Based Brain-Controlled Intelligent Robot System Sep 2026 – Present

- Developing an EEG-based AI system that recognizes intended movements from brain signals and converts them into control commands. Working with EEG signal processing, MNE, NumPy, Pandas, PyTorch and Transformer-based deep learning models.

AI-Powered Crop Yield Prediction & Optimization Sep 2025 – Feb 2026

- Developed an AI-powered platform using weather and soil data for crop yield prediction and optimization. Worked on data preprocessing, machine learning models, datasets and integration of project components.

Face Attendance Recognition System Feb 2026 – Mar 2026

- Developed an automated attendance system using real-time face detection and recognition with Python, OpenCV and Face Recognition, with NumPy and CSV for data handling.

Invoice Generator May 2025 – Aug 2025

- Developed a web-based invoice generator using Python and Flask, with SQLite for data handling and database integration.

SKILLS

Languages: Java, Python, C, JavaScript, SQL **AI/ML:** Machine Learning, Deep Learning, PyTorch, CNN, Transformers, Neural Networks, Computer Vision
Web: HTML, CSS, React, Node.js, Express.js, Flask, FastAPI **Data/Tools:** MongoDB, SQLite, NumPy, Git, GitHub, MNE **Engineering:** Data Structures & Algorithms, System Design, API Design, Problem Solving

EXTRA-CURRICULAR ACTIVITIES

- **Smart India Hackathon (SIH):** Participated and collaborated with a team to develop a technology-based solution for a real-world problem.
- **HackerRank Orchestrate – 24-Hour Hackathon:** Participated in a global hackathon focused on designing and building an AI-powered agent to solve a real-world problem.

Portfolio website: add the live URL after GitHub Pages deployment.
